GUARANTEED 100 YEARS

1991 begins a new chapter in Western Cutlery's long and successful heritage of producing fine cutlery. We've taken a long hard look at ourselves in ways to improve upon our strengths so we can answer our customer's needs over the next 75 years.

Our new management team blends years of varied industry experience and marketing savvy with renewed commitment and enthusiasm. This means being responsive to our customers in all aspects of our business especially in regards to customer service and shipping. Our mission is simple. Western Cutlery will manufacture the highest quality knives at a value-intensive price.

This commitment to excellence has become a living philosophy that we are all embracing and taking very seriously. Quality must begin from the ground up - that is why we build our blades with top-grade, high-carbon Chrome-vanadium and stainless steel. The nickel-silver bolsters and guards are coined and stamped in-house under close scrutiny.

To stay on top of an ever-changing market demands being attentive to customers needs then following through on promises. We are investing in the future by instituting world class manufacturing processes that can make the difference in a customer's order sitting on the shelf for days or moving out the door quickly. However, craftsmanship is still the cornerstone of Western's products. Some of our knives take 150 hand operations so we make every employee a quality control inspector. Each Western employee is "quality certified" with authorization to reject any knife during manufacturing if it doesn't meet our rigid requirements. This accountability builds pride in craftsmanship and improves quality.

It's easy to see why we proudly stand behind our products with the best warranty in the business. We guarantee every Western knife will be shaving sharp out of the box and free of defects in materials and workmanship. Furthermore, we warrant our cutlery for 100 years no matter who the owner is. If one of our customers is not happy with our knife, we will repair or replace the knife free of charge. No fine print, just customer satisfaction.

In the following pages, you will see some of the most innovative and functional knives available anywhere. We appreciate your patronage and feel confident after review you will be as excited about our line as we are.
